

Hi Dmitry, thank you for making time for this second-round conversation. We'd like to ask a few more specific questions today.

Sure, thank you for having me.

You mentioned experience in Poland and Czech Republic. Can you describe the type of construction sites you worked on?

Yes, mostly residential and small commercial buildings. I helped with materials, site cleaning, and assisting skilled workers.

Have you used any tools or equipment such as drills, saws, or lifts?

Yes, I've used drills, small saws, and handled ladders and basic scaffolding under supervision.

How do you make sure you're working safely on site?

I always wear PPE, follow the site rules, and ask questions if I'm unsure about a task.

Have you had to work outside in difficult weather or long shifts?

Yes, in both winter and hot days. I'm used to working in different conditions.

Are you comfortable lifting materials or working at heights if required?

Yes, I'm physically fit and have no issue with lifting or working on ladders.

What do you do if a task is unclear or if you disagree with a coworker?

I ask the supervisor or clarify with the team calmly. It's important to stay professional.

Thanks Dmitry. That's all from our side. We'll reach out again once we finalize our decisions.

Thank you. I really appreciate the opportunity.
